

ENVIRONMENTAL POLICY

At Aire – Valley Architectural Aluminium Ltd - We recognise that our activities have an impact on the environment, arising from our consumption of raw materials, energy, water and our generation of waste and emissions to land, air and water.

In order to minimise the environmental impact our policy is to;

- Quantify, monitor and review all environmental impacts of the business and set targets for improvement where possible
- Comply with current legislation applicable to the company's activities and seek to comply with future legislation as it becomes law
- Integrate environmental objectives into relevant business decisions as long as economics prevail
- Investing in new products and processes that have an improved performance regarding their impact on the environment
- Require all staff to address environmental responsibilities within the framework of normal operating procedures
- Minimise waste, dispose of waste responsibly and attempt to recover waste where practical
- Continual improvement in our environmental performance and minimising the risks of pollution arising on our site and on clients sites
- Influence suppliers of goods to reduce their impact on the environment
- Enhance awareness amongst customers of environmental policy of company

Aire – Valley Architectural Aluminium Ltd will review this policy on annual basis, taking account of any changes within legislation and our organisation, and other factors.

We will communicate this policy to all our employees and ensure that they are given appropriate training to raise awareness of environmental issues.

Aire – Valley Architectural Aluminium Ltd will make this policy available when requested to interested parties including members of the public.
